EXPERIENCE

Miroma Project Factory Redfern, Sydney

Business Intelligence Developer Intern Sep 2026 – Present

- Profiled **100+ tables across five data sources**: Salesforce, Monday.com, Jobpac, Procore and Procure by using **Power Query** to understand data structures, then performed **EDA using Python on key sales tables**, identifying missing values, inconsistent text and data-type issues. Created a **data dictionary** documenting table structures and findings to support reporting and Power BI model development.
- Cleaned and transformed reporting data using **Power Query**, addressing missing values, standardising text and correcting data types. Collaborated with developers to resolve underlying data issues in the database.
- Mapped client reporting requirements to relevant source tables and fields, and developed Power BI using **star-schema models** technique, defining fact and dimension tables, data grain and relationships to support analysis of sales performance, construction budgets and cost forecasts, and defect resolution.
- Developed four Power BI dashboards for Sales, Construction Costs, Defects and End of Development reporting, using **DAX measures**, **interactive visuals** and **filters** to help stakeholders monitor project performance. Presented dashboards in the client showcase, with all four planned for operational use following project completion.

MentorME Bankstown, Sydney

Software Development Intern Jun 2026 – Sep 2026

- Implemented **user behaviour tracking using Google Analytics 4 (GA4) and Google Tag Manager (GTM)**, configuring events for button clicks, CV uploads and analysis result views to help the team understand engagement with key website features.
- Improved the **CV upload and analysis flow** with input validation, loading indicators and error messages, helping users identify invalid inputs, track processing progress.
- Developed **React** and **TypeScript** UI components for the Career Mirror website from **Figma** designs with AI assistance in **Cursor** and collaborated with developers using **Git** and **GitHub**.

PROJECTS

ABC Fashion Website AI Shopping Stylist (Live Prototype) Jul 2026 – Present

Software Developer – Database Design | University Industry Project | Salesforce client

- Designed a **relational database schema in Supabase (PostgreSQL)** for products, categories, sizes, inventory and tags to support product browsing, size selection and stock management.
- Defined **primary and foreign keys, category hierarchies, junction tables and constraints** to maintain data integrity. Created **ERDs and data dictionaries** to guide implementation, maintenance and technical handover.
- Collaborated with application developers to align database structures with **product search and recommendation requirements**, documenting data storage decisions to support application integration.
- Supported frontend development by implementing the shopping-cart page using **React** and **Next.js**.

EDUCATION

Macquarie University Nov 2026 (Expected)

Bachelor of Commerce (Business Information Systems) | **WAM: 78.7/100 (Distinction)**

Relevant Coursework: Fundamentals of Computer Science **(86/100)**, Discrete Mathematics **(96/100)**, Applications Modelling and Development **(93/100)**, Information Systems and Database Design, Advanced Web Development. **Awards:** **2nd** Place - MentorME Futura Remix Hackathon (View) | ASA DataFest 2026 Certificate (View).

Certifications: SQL Intermediate - HackerRank (View) | IT Audit Fundamental - Udemy (View).

SKILLS

Data & Databases: SQL, PostgreSQL, Python (Pandas, NumPy), Supabase, MongoDB.
Reporting & Analytics: Power BI, Power Query, DAX, Excel, Google Analytics 4 (GA4).
Data Quality & Modelling: Data Profiling, Data Transformation, Modelling, Relational Database Design, ERDs.
Development & Tools: APIs, Node.js, TypeScript, React, Next.js, Git, GitHub, Figma, Jira, Asana.
